

Fitting Instructions for: Ready – Made Non stretchable furniture slipcovers

Step 1
Start from front of furniture. Find “center front” label on inside of slipover and drape slipcover over furniture

Step 2
Once it’s draped over furniture, make sure slipcover touches the floor evenly on all four sides.

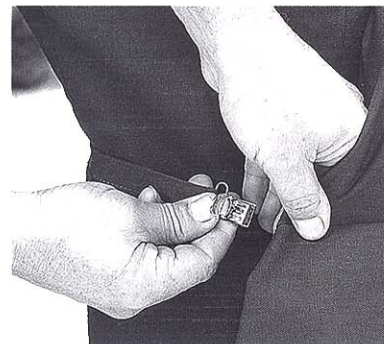

Step 3
Locate ready-made arm pockets on left and right sides of a cover. Tuck excess slipcover fabric toward the back of furniture arm.

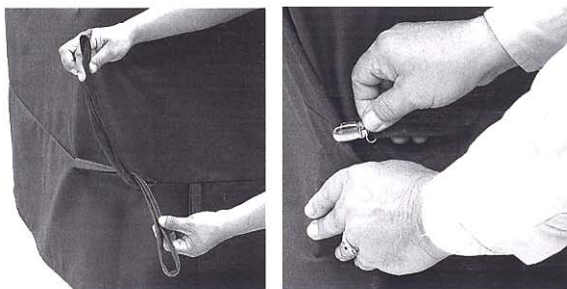

Step 4
Lift back of cushions, tuck excess fabric under the seat cushions.

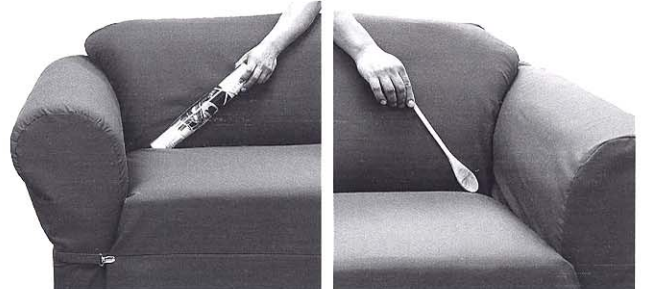

Step 5
Tuck and smooth excess fabric, on both sides of furniture and into the back of back crease where arms and back meet.

Step 6
Fold excess fabric into a pleat in front of furniture arms and tighten them with attached clip-on locks.

Step 7
Fold excess fabric into a pleats in the back of a couch at both ends, tighten to create tension between front of the arm and back of a couch on both sides. Fasten with provided set of ties or clip-on locks. **Do Not** over tighten slipcover.

Helpful Tips:
Use a spatula to push the excess fabric deep between cushions. Easy Fit slipcovers are made with anchoring elastic to keep them in place, if your cushions do not offer tight fit, you can push a rolled-up magazine between cushions to better anchor the slipcover in lace.

ALL DONE!
